

# Investment Funds in China

## A New Look

Written by  
Stuart Leckie & Rita Xiao

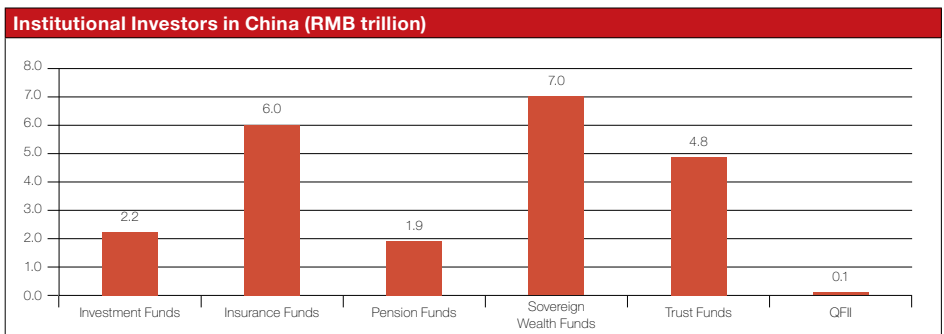

## Investment Funds in China: A New Look

The China miracle emanates from the economic reforms since 1978. After more than three decades of significant growth, China has attracted enormous attention as the most dynamic, complex and fast-changing economy in the world.

This book, by Stuart Leckie and Rita Xiao, aims to describe and explain the changing financial markets and asset management arena in China for an international audience. The investment funds industry, which reached a peak in 2007, unexpectedly shrank thereafter. An insider's look will be provided in this book regarding the reasons for decline, the current state of the industry, and a possible roadmap ahead. Moreover, a comprehensive review is given in respect of interactions among institutional investors in the asset management space, including fund management companies, insurance companies, sovereign wealth funds, pension funds, trust companies, QFIIs, etc.

New market entrants will find this book a definitive and essential information source on China's asset management landscape. For seasoned veterans with a China presence for many years, the book also captures the latest developments, statistics and comprehensive market data in one easy and insightful text.

“ This book contains a useful compendium of the main strands of development of investing in the Chinese domestic capital markets. I congratulate Mr. Leckie, and Ms. Xiao, for yet another useful tome for the practitioner and the general reader interested in the developing markets in China.”

Anthony Neoh

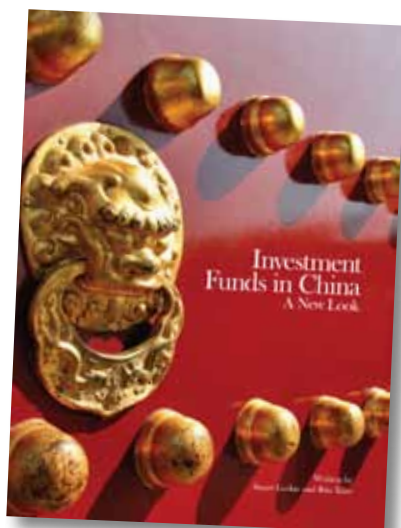

Former Chairman of Hong Kong Securities and Futures Commission  
Former Chief Advisor to the China Securities Regulatory Commission
